LEADERSHIP

Harold Mills
CEO

CEO of VMD Ventures focused on investing in entrepreneurs in a variety of technology and service industries. Mills is also former Chairman and Chief Executive Officer of ZeroChaos, a leading global workforce management company. Mills is attributed with building ZeroChaos from inception to a multi-billion-dollar company with operations in over 53 countries.

He serves on the boards of Guidewell and Florida Blue, Rollins College, University of Central Florida, Dr. Phillips Performing Arts Center, and LIFT Orlando, among others. He is a past board member for Florida Council of 100, Florida A&M University, the Jacksonville Branch of the Federal Reserve Bank of Atlanta and former chairman of Florida Citrus Sports, and recently he led the Heart of Florida's United Way campaign.

A Henry Crown Fellow and member of the Aspen Global Leaders, Mr. Mills has been honored with many awards including the EY (formerly Ernst & Young) Entrepreneur of the Year; the Peter Yessne Industry Innovator of the Year; Human Resources Outsourcing Association Thought Leader of the Year; Orlando's Entrepreneur of the Year; Orlando Business Journal's Top 40 under 40, and many others. He has been featured in many industry and trade magazines, business journals and other business and trade outlets.

Mr. Mills earned a bachelor's degree from Purdue University and an MBA from Harvard Business School.

Adrian Muhammad
Managing Partner

Mr. Muhammad layers a penetrating insight in business, finance, strategy and marketing in the stewardship of strategic, operational and technical engagements for some of the largest organizations in the world.

Mr. Muhammad most recently served as Vice-President of the Corporate Initiative Group for ZeroChaos, a global business unit created specifically to advantage Mr. Muhammad's strategic, analytical, operational and innovation-centered skillset.

Possessing over 20 years of technology, consulting and business development experience, Mr. Muhammad has worked with a wide range of organizations from start-up to global, publicly traded companies in a number of industries including manufacturing, private equity, international finance, technology, telecommunications, product development, consulting, marketing, and government.

Mr. Muhammad received his Bachelor of Science Degree in Computer Information Systems (CIS) from Purdue University and is a graduate of Harvard Business School's Advanced Management Program (AMP 195). Mr. Muhammad is also a graduate of Singularity University; the acclaimed global exponential innovation think tank based at the NASA Research Park in Silicon Valley.

Carlos Y. Quiñones
Managing Partner

Carlos Quiñones, a native of San Juan, Puerto Rico has 20 years of demonstrated history working in small business development, strategic marketing operations and international business. Lead operations and strategic direction of certified minority business enterprise, Display America. Responsible for bottom-line factors, long-range planning, growth, product development and marketing. Display America, Inc. (DA), established in 2003, is a Minority and Family Owned Business with strategic locations in Orlando, Atlanta, Chicago, Las Vegas and San Juan. The DA team combines over 50 years of experience in designing brand-driven, customer-focused exhibits, events and experiences for companies of all sizes around the world.

Quiñones serves on the board of InRoads Visiones, Florida State Minority MBEIC and FAHS Sports Hall of Fame. He is actively involved in the community and non-profit organizations such as Hands on Atlanta, Second Harvest of Central Florida and Alzheimer's Association. Quiñones graduated from the Department of Defense Schools in Frankfurt, Germany and earned his BBA from Georgia State University.

SAFETY BEGINS HERE

With the massive spread of COVID-19, daily life will never again be as we knew it. We are going through many changes, and with these changes comes the need, responsibility, and obligation to protect ourselves and those around us. The COVID-19 crisis has created a surge demand for personal protective equipment (PPE) by the public. VMD Global Health strives to provide quality products at reasonable prices, so that we all have access to health protection in our communities and workplaces.

GLOVES

There are many different glove options available to suit different needs. The level of protection, comfort, durability and more all vary between the types of gloves, which include latex gloves, nitrile gloves and vinyl gloves.

GLOVES

Nitrile Gloves

Medical Nitrile gloves are a great compromise between latex and vinyl. Our Medical Nitrile gloves offer protection from bodily fluids providing a barrier that prevents infection, cross-infection or cross-contamination. Tests revealed that Medical Nitrile gloves are three times more puncture-resistant than rubber gloves. Nitrile exam gloves are the material of choice for many professional users because of its cut resistance, chemical resistance, allergy resistance and cost.

- Disposable Nitrile Examination Gloves, Powder Free, Non-sterile
- For Medical Use, Food Contact Use, General Use
- Primary Material: Acrylonitrile Butadiene Synthetic Rubber Latex
- Latex Protein Content: Latex-Free

Medical and surgical grade, powder and latex-free.
Disposable
(XS , M, L, XL)

GLOVES

Various Glove Options

Nitrile Gloves

- Made of synthetic material
- Stretchy, durable
- Protects against chemicals, viruses

Latex Gloves

- Made of natural rubber
- Highest comfort, flexibility, fit and tactile sensitivity
- Protects against bacteria and viruses

Vinyl Gloves

- Made of synthetic material sometimes referred to as synthetic)
- Cost-efficient synthetic option
- Comfortable
- Protects against chemicals

Gloves Dispenser

- Triple - holds 3 boxes of gloves
- Double - holds 2 boxes of gloves
- Single - holds 1 box of gloves

GOWNS

Gowns are personal protective equipment used in health care settings. They are used to protect the wearer from the spread of infection or illness if the wearer comes in contact with potentially infectious liquid and solid material. They may also be used to help prevent the gown wearer from transferring microorganisms that could harm vulnerable patients, such as those with weakened immune systems.

GOWNS

AAMI Levels 1-4

All gowns can be made to meet the following levels, style specifications and details.

- Level 1:** Minimal barrier risk, to be used, for example, during basic care, standard isolation, cover gown for visitors, or in a standard medical unit.
- Level 2:** Low barrier risk, to be used, for example, during blood draw, suturing, in the Intensive Care Unit (ICU), or a pathology lab.
- Level 3:** Moderate barrier risk, to be used, for example, during arterial blood draw, inserting an Intravenous (IV) line, in the Emergency Room, or for trauma cases.
- Level 4:** High barrier risk, to be used, for example, during long, fluid intense procedures, surgery, when pathogens resistance is needed or infectious diseases are suspected (non-airborne).

GOWNS

Gown Materials & Style Options

[CPE] Chlorinated Polyethylene

A single layer of polyethylene (plastic) film provides protection at an affordable cost.

[PEVA] Polyethylene Vinyl Acetate

A PVC-free, non chlorinated, odorless and biodegradable material. PEVA has been developed as a healthier and environmentally friendly option.

[PP+PE] Polypropylene + Polyethylene

Constructed from non-woven, soft and fluid-resistant material with a fluid-impervious coating.

[SMS] Spunbond Meltblown Spunbond

SMS is a triple density breathable material composed of inner layers of meltblown polypropylene between outer layers of spunbond polypropylene that is ideal for extended wear and has excellent barrier strength.

Neck Style Options

Tape-Tab • Tie-Neck

GOWNS

Level 2 Isolation Gown

- Non-Sterile
- Individually wrapped
- Single use, disposable
- Exceptional design and comfort
- Length: 120cm (measured at front from middle of neckline to bottom)
- Cuff is stretchy interlocked jersey material
- Velcro closure at back of neck

1. High-performance protection against bacteria.
2. Fabric spunbond non-woven material (SMS, SMMS)
3. Outer layer is liquid penetration resistant.
4. Antistatic, alcohol-resistant and blood-resistant.

Cuff is made from stretchy interlocked jersey material

GOWNS

AAMI Level 3 Disposable Surgical Gown

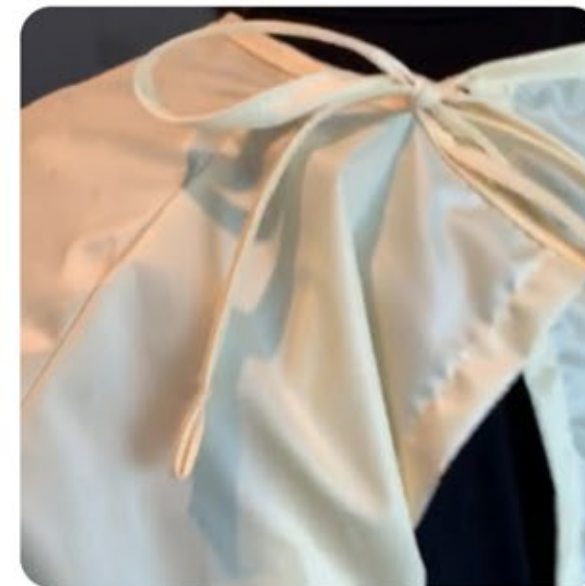

The ANSI/AAMI PB70 standard includes four standard tests to evaluate the barrier effectiveness of surgical gowns, etc. Based on the results of these standardized tests, four levels of barrier performance are defined, with Level 1 being the lowest level of protection, and Level 4 being the highest level of protection.

- Recommended for: Arterial blood draw, Inserting an IV, Emergency Room, Trauma.
- Moderate water resistance (resistant to water spray and some resistance to water penetration under constant contact with increasing pressure).

Used in MODERATE risk situation:

- Provides a barrier to larger amounts of fluid penetration through splatter and more fluid exposure through soaking than Level 2.
- Two tests are conducted to test barrier protection performance:
 1. Water impacting the surface of the gown material.
 2. Pressurizing the material.

MASKS

Surgical and protective face masks are fitted protection devices that help to limit the spread of potentially hazardous particles that are expelled by the wearer, while protecting the practitioner, patient and civilian from splashes, sprays, splatters of fluids and particles in the air.

MASKS

Respirators

 NIOSH	N95 NIOSH Hard Cover Mask: An N95 respirator is a respiratory protective device designed to achieve a close facial fit and high efficiency filtration of airborne particles. Recommended for medical use.	Disposable High Fluid Resistance Filtration Efficiency Filters at least 95% of airborne particles.
 NIOSH	N95 NIOSH Soft Cover Mask: An N95 respirator is a flat and folded respiratory protective device with an adjustable nose clip, designed to achieve a close facial fit and high efficiency filtration of airborne particles. Recommended for medical use.	Disposable High Fluid Resistance Filtration Efficiency Filters at least 95% of airborne particles.
	KN95 Mask: A folding face mask suitable for respiratory protection, filtering dust, haze, bacteria droplets and other harmful particles in the air. Recommended for general and medical use.	Disposable High Fluid Resistance Filtration Efficiency Filters at least 95% of airborne particles.

MASKS

3-Ply Masks

ASTM Level 1: Ideal for procedures where low amounts of fluid, splash, spray and/or aerosols are produced. Used for general procedures and respiratory etiquette.	Disposable Minimal Fluid Resistance Filtration Efficiency BFE ≥ 95% PFE ≥ 95%
ASTM Level 2: Ideal for procedures where moderate to light amounts of fluid, splash, spray and/or aerosols are produced.	Disposable Moderate Fluid Resistance Filtration Efficiency BFE ≥ 98% PFE ≥ 98%
ASTM Level 3: Ideal for procedures where heavy to moderate amounts of fluid, splash, spray and/or aerosols are produced.	Disposable High Fluid Resistance Filtration Efficiency BFE ≥ 98% PFE ≥ 98%

MASKS

Fabric Masks

Hanes® 3-Ply 100% Cotton Knit Mask: A soft, washable and reusable non-medical grade mask with three layers of coverage. Designed for comfortable and breathable everyday wear, featuring moisture-wicking fabric.

Washable/Reusable

2-Ply/3-Ply Woven Mask: This 100% cotton lightweight mask is breathable and bio-degradable, making it a comfortable and environmentally conscious choice.

Washable/Reusable

2-Ply/3-Ply Cotton Mask: Made with 100% cotton, this mask is breathable and antimicrobial. Its pleated construction wicks away moisture providing ultimate comfort.

Washable/Reusable

5-Ply/3-Ply Mask: This high protection mask is made from sustainably sourced wood pulp and polyester. It is extremely strong, comfortable and gentle with an excellent barrier capacity.

BOOT & SHOE COVERS

Non-Woven Boot Cover: Also known as spatter guards, this classic footwear is ideal for covering the instep and ankle.

Non-Skid Disposable One-Size-Fits-All

SMS Boot Cover: Made with spunbond meltblown spunbond polypropylene, this material is breathable and reliable.

Non-Skid Disposable One-Size-Fits-All

Polyester Boot Cover: Also known as spatter guards, this classic footwear is ideal for covering the instep and ankle.

Non-Skid Disposable One-Size-Fits-All

Shoe Covers: Dust-proof and anti-slip and widely used in hospitals and clinics to ensure optimal hygiene. Made from non-woven fabric, making them durable and eco-friendly, with a quality elastic band for flexibility. Easy to put on and take off.

Non-Skid Disposable One-Size-Fits-All

HEAD COVERINGS

Bouffant Cap: A non-woven industry standard that is lightweight and comfortable with a gentle synthetic elastic providing secure coverage.

Disposable One-Size-Fits-All

Surgeon's Beret: Non-woven polypropylene fabric effectively blocks dust, microbes and droplets. This soft, comfortable, lightweight and anti-static material will not irritate the skin.

Disposable One-Size-Fits-All

Mob Cap: This 21" non-woven cap features full elastic bands and an accordion style opening. Spunbond polypropylene creates a solid barrier that's perfect for hospital and laboratory use.

Disposable One-Size-Fits-All

Nurse's Bonnet: A non-woven spunbond polypropylene fabric creates a solid barrier against dust, microbes and droplets. It is breathable and stays cool, dry and comfortable over a long period of time, with a reinforced elastic band that gives a snug fit.

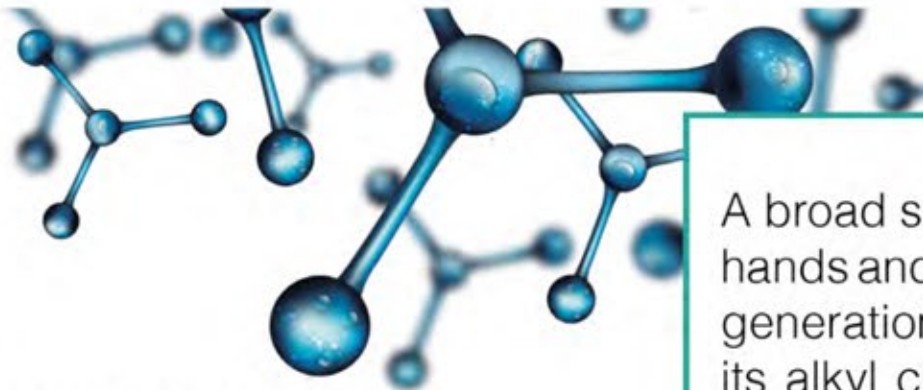

Disposable One-Size-Fits-All

SANITIZER

Manufactured exclusively for VMD Global Health, [Naturatlali](#) offers a 70% alcohol based antibacterial hand sanitizer, an alcohol free eco-friendly antiviral hand sanitizer and a 10% alcohol antiviral sanitizer and moisturizing hand lotion. All are FDA approved. Additionally, we white label at no extra cost, making our sanitizer products your very own.

Non Alcohol Eco-Friendly
Antiviral Hand Sanitizer

AMMONIUM QUATERNARIES
5th generation

A broad spectrum antiseptic solution for hands and surfaces. Formulated from 5th generation ammonium quaternary salts, its alkyl chains are those that have the greatest antibacterial power, fungicidal and virucidal action. These molecules are widely used in hospital disinfection, as well as a bactericide for deodorant use in foot powders and topical disinfectants.
